SUMMARY

Software Engineer and Computer Science undergraduate experienced in full-stack development and collaborative software projects, with a growing interest in AI, LLMs, and intelligent systems. I value small, fast-paced, high-impact teams.

WORK EXPERIENCE

Intern - Associate Software Engineer

May 2026 - Present

- Working in the **App Engine Team** that owns ServiceNow Application Development tools - App Engine Studio, ServiceNow Studio, and Creator Studio.
- Developed a **unified dashboard** that aims to boost productivity at both developer and manager level. Integrated its features with **Claude writing skills for effective summarization and enable custom offerings**.
- Worked on **Automation Testing** by writing 20+ E2Es using Playwright and Java.

Technology Apprentice, Morgan Stanley

Jul 2024 - April 2026

- Worked in the **CVA (Counterparty Valuation Adjustment) technology team** dealing with counterparty risk management.
- Developed a **management and audit tool** for the **environment overrides** of **UNIX** systems and **Symphony** Applications.
- The tool projects a reduction in the efforts of setting up and managing environment and Symphony overrides.
- Working primarily on technologies like **Scala, Java, Linux, Autosys**.

PERSONAL PROJECTS

Event Bus [\[Review Here\]](#)

Mar 2026

- Tech Stack:** Multiprocessing Library Python, Redis Pub-Sub
- A Distributed Request Dispatch System where work is broadcast to multiple workers.
- Ownership is determined through first-claim mechanism. Workers can stream real-time updates back to clients.
- Prototype-d using Multiprocessing Library in Python and then migrated to Redis Pub-sub.

Renaissance [\[Review Here\]](#)

Mar 2024

- Tech Stack:** MERN Stack, Fastify
- Collaborative platform for co-authoring literary pieces, inspired by GitHub workflows.
- Supports forking, committing, pushing, and real-time chat rooms for discussion.
- V2 in development with revised architecture. Plan is to ship as a Desktop Application rather than a web view.

Project June [\[Review Here\]](#)

Jun 2025

- Tech Stack:** LangChain, RAG, Gemini, HuggingFace, SerpApi, React, Express.js, TypeScript, ShadCn
- AI-powered web agent for document brainstorming and Wikipedia exploration using RAG and LLM techniques.
- Integrates real-time web search through SerpAPI and supports external knowledge retrieval.
- Wraps Google Gemini via LangChain with HuggingFace embeddings for semantic understanding.

SKILLS

- Languages:** Java, C++, Scala, JavaScript, TypeScript, Python
- Frameworks & Libraries:** React, Express.js, Node.js, LangChain, Tailwind CSS
- Tools & Platforms:** Git, Linux, Netlify, Render, Playwright, Postman, ServiceNow Application Development
- Artificial Intelligence:** RAG, Agentic AI, Skills

EDUCATION

Bachelor of Engineering (Software Product Engineering)

Jul 2023 - Present

Kalvium's UG Program at Chitkara University, Himachal Pradesh | **CGPA: 10**

POSITIONS OF RESPONSIBILITY & VOLUNTEERING

National Cadet Corps

Jul 2019- Jan 2021

Served as a cadet in the National Cadet Corps. Developed soft skills like **Teamwork, Leadership, and Diligence**.

Bharat Scouts and Guides

Jul 2019 - Mar 2022

Served as a scout in Bharat Scouts and Guides. Developed soft skills like **Coordination, Teamwork, and Empathy**.
